how well do the places where we live support the wellbeing of older adults the canadian population is growing older and is reshaping the nation s economic social and cultural future however the built and social environments of many communities neighbourhoods and cities have not been designed to help canadians age well bringing together academic research practitioner reflections and personal narratives from older adults across canada this cutting edge text provides a rare spotlight on the local implications of aging in canadian cities and communities it explores employment housing transportation cultural safety health planning and more to provide a wide ranging and comprehensive discussion of how to build supportive communities for canadians of all ages

it took an oil crisis in the 1970s for the dutch to realize that they simply couldn t afford to live without bicycles and today the dutch lead the world in urban cycling fifty years later another crisis the pandemic has led to a boom in bicycling and a radical rethinking of the future of urban mobility demonstrating the possibility of a car free urban future the pandemic bikeboom is one of the very few bright spots in an otherwise terrible time and

an opportunity we cannot waste the climate crisis is all too real the inequities in our cities too severe to allow the us to backslide to the status quo of car dependence in bicycle city riding the bike boom to a brighter future cycling expert daniel piatkowski argues that the bicycle is the best tool that we have to improve our cities the car free urban future where cities are vibrant with access to everything we need close by may be less bike centric than we think but bikes are a crucial first step to getting americans out of cars bicycle city is about making cities better with bikes rather than for bikes piatkowski offers a vision for the car free urban future that so many americans are trying to create with no shortage of pragmatic lessons to get there electric bikes are demonstrating the ability of bikes to replace cars in more places and for more people cargo bikes with electric assistance are replacing suvs for families and delivery trucks for freight at the same time mobility startups are providing new ownership models to make these new bikes easier to use and own ushering in a new era of pedal powered cities bicycle city brings together the latest research with interviews anecdotes and case studies from around the world to show readers how to harness the post pandemic bikeboom piatkowski illustrates how the future of bicycling will facilitate the necessary urban transitions to mitigate the impending climate crisis and support just and equitable transport systems

tells how to select the right bike offers advice on safe riding and discusses tours racing and workouts

this publication is part of wp 29 how it works and how to join it series it examines issues progress and challenges in efforts to improve the safety and wellbeing of motorcycle riders through the use of approved motorcycle helmets the growth in motorcycles is accompanied by an increase in serious and fatal accidents evidence shows that once internationally harmonized helmet regulations such as the un regulation no 22 type approval system for helmets are in place and laws on helmet wearing are enforced these trends tend to reverse in examining the relationship of income growth and national motorcycle fleet expansion this study argues the socio economic case for introduction of helmet regulations and their enforcement by delivering a benefit cost analysis of taking such legislative actions

electric bicycles have quietly become one of the most practical tools for modern mobility yet many riders never move beyond surface level use because they were never shown how these machines truly work or how to use them properly over time this guide was written to close that gap inside the pages of this guide you ll find a clear methodical breakdown of electric bike ownership from the ground up the book explains not only what each component does but why it matters in real riding conditions motors batteries control systems braking riding dynamics maintenance routines and long term ownership decisions are explored with clarity and purpose using everyday language rather than technical overload what sets this guide apart is its practical hands on approach numerous diagrams instructional visuals real world photos and images showing riders interacting with their bikes bring every concept to life complex ideas aren t just described they are shown step by step so you can see exactly what to do and how it looks in practice where

riders often make costly or unsafe mistakes this guide slows down and demonstrates safer smarter methods making learning both easier and more effective what this guide delivers a working understanding of electric bike systems and how they interact clear guidance on battery care range management and energy efficiency practical maintenance routines that protect performance and reliability riding techniques that improve safety control and comfort visual aids diagrams and real world images that make every step easy to follow ownership insights covering security cost management and longevity skill development that grows naturally with experience who will benefit most new riders who want to start correctly bicycle riders transitioning to electric assistance commuters relying on their bike daily owners who want fewer breakdowns and better performance anyone who values understanding over trial and error rather than treating electric bikes as gadgets this book treats them as tools tools that reward informed use consistent care and thoughtful riding habits by the end readers are equipped not just with information but with judgment the ability to make better decisions before during and after every ride learn it once see it clearly ride better for years start here

this work contains papers presented at the international conference on traffic and transportation studies iccts held in nanning china from august 5 7 2008 of the 93 papers in this proceedings 49 of them are written by authors from mainland china while the other 44 papers have been contributed by authors representing 14 different countries and regions
